

phpMyEdit Commercial Licensing

Open-source version of phpMyEdit is available under license called *GNU: General Public License*. If for some reason GNU licensing does not meet your needs, you have the option to purchase a phpMyEdit Commercial License, available from PLATON GROUP.

Using this commercial license you can use phpMyEdit in your projects and these projects no longer need to be an open-source software. You can also sell your product to the public without releasing your source codes. Basically all the *GNU GPL* obligations can be omitted with the phpMyEdit Commercial License. You do not need to worry about them, anymore!
